Sir:

Prior to examination, please amend the above-identified application as follows:

**IN THE SPECIFICATION:**

**Page 20, please delete the fourth full paragraph, and replace with the following new paragraph:**

a-16: Electromotive force  $V_{2p_{rev}}$  which is positive on the side of the terminal 127f and is negative on the side of the terminal 127e is also caused on the secondary winding by back electromotive force  $V_{1_{rev}}$  caused on the primary winding of the transformer 103, however, the level is Zener voltage  $V_{z28}$  of the Zener diode 128a or less and the circuit on the secondary side becomes a non-conducting state by the Zener diode 128a (refer to a mathematical equation 5).
